

VARUN RAMESH JANGALE

Frontend Engineer · React.js · Angular · AI-Integrated Web Applications

varunrameshjangale93@gmail.com | 7349793037 / 7996456993 | github.com/Varun1206Tom | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Engineer with 2+ years of production experience building scalable, high-performance web applications using React.js and Angular 14. Delivered real-world integrations including payment gateways (Razorpay, CCAvenue, Cashfree), real-time order tracking via Socket.IO, location features via Google Maps API, and a Gemini-LLM-powered conversational chatbot integrated into a production admin panel. Proven record of implementing role-based access control, webhook reliability systems, and performance-optimised UI. Actively upskilling in system design and full-stack engineering to grow into product and AI-integrated engineering roles.

TECHNICAL SKILLS

- Frontend:** React.js, Angular 14, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS
- UI Libraries:** Material UI, CoreUI, NGX Bootstrap, Bootstrap
- Backend (Working Knowledge):** Node.js, Express.js, MongoDB, REST API design
- Integrations:** Razorpay, CCAvenue, Cashfree, Socket.IO, Google Maps API
- AI Integration:** Gemini LLM API integration, prompt engineering, conversational chatbot design, multi-step function-calling orchestration
- Tools & DevOps:** Git, GitHub, Postman, Figma, VS Code
- AI-Assisted Dev:** Cursor, GitHub Copilot, ChatGPT
- Currently Learning:** Next.js, automated testing (Jest), System Design, Docker, CI/CD, Full-Stack Architecture

WORK EXPERIENCE

Bex Technologies Pvt Ltd, Panaji, Goa

Frontend Developer | Dec 2023 – Present

- Built and shipped a React.js admin panel managing vendors, admin users, products, procurements and more with role-based access control across 12 modules — streamlining platform operations and reducing manual admin effort significantly.
- Architected a Redux permission system controlling edit, delete, and module visibility for 5 distinct user roles, ensuring secure and granular access across the platform.
- Designed and integrated a Gemini-LLM-powered chatbot into the Xpanse admin panel, handling multi-step API orchestration, function-calling schemas, and graceful error handling for AI responses.
- Integrated Razorpay and CCAvenue payment gateways into a live customer-facing café ordering platform, enabling seamless and reliable transaction processing.
- Implemented Socket.IO for real-time menu product updates in the Xpanse Café web application.
- Implemented a webhook fallback mechanism ensuring 99%+ order creation reliability even during payment gateway timeouts.
- Integrated Google Maps API for delivery location features, improving logistics accuracy across customer-facing flows.
- Converted 8+ Figma designs into pixel-perfect, responsive production UI components with cross-device compatibility across mobile and desktop.
- Designed reusable component libraries in React.js, improving development speed and UI consistency across multiple panels.
- Integrated REST APIs for real-time data synchronisation between frontend and backend systems.

KEY PROJECTS

AI Chatbot Integration — Xpanse Admin Panel (Gemini LLM, React.js, REST APIs)

- Architected an admin panel chatbot using Gemini Flash, designing multi-step API orchestration and function-calling schemas for context-aware conversations.
- Built frontend logic to parse, render, and gracefully handle AI-generated responses within existing admin workflows.
- Implemented error handling and fallback flows for AI response failures, ensuring a reliable user experience even when model output was unpredictable.

Xpanse Admin Panel — React.js, Redux, REST APIs, SCSS

- Designed and built a centralised admin panel managing menus, orders, analytics, and multi-vendor operations.
- Implemented granular role-permission engine supporting 5 user roles with module-level access, edit, and delete controls.
- Reduced manual operations through an automated order tracking dashboard with real-time data sync.

Xpanse Cafe Website — React.js, SCSS, Socket.IO, CCAvenue, Google Maps API

- Built a fully responsive customer-facing café ordering platform with real-time order status updates via Socket.IO.
- Integrated 3 payment gateways and Google Maps for delivery location, handling live customer transactions.

- Achieved a smooth cross-device experience with consistent UI across mobile, tablet, and desktop.

Inventory & Sales Management System — *React.js, Node.js, MongoDB*

- Built a full-stack application with cart workflows, order processing, inventory tracking, and an analytics dashboard.
- One of the few end-to-end owned projects demonstrating full-stack capability across frontend, backend, and database.

BEX Attendance Admin Panel — *Angular 14*

- Developed an Angular 14 admin panel for attendance management, with analytical reporting dashboards for management visibility across employee attendance data.

Xpanse Investor SPA — *React.js, SCSS*

- Built a mobile-first franchise contact platform allowing potential partners to submit inquiries through a clean, simple UI.
- Ensured seamless form submission and quick navigation across all devices with a responsive, user-focused design.

BexCart Website — *React.js, REST APIs, Webhook Integration*

- Implemented order reliability logic by verifying webhook order creation status on an e-commerce platform.
- Built a fallback mechanism that calls a separate API to create orders manually when webhooks fail, ensuring backend consistency and seamless user experience.

BexCart Vendor Panel — *React.js, REST APIs, SCSS*

- Built vendor-specific modules for product listings, inventory management, and sales tracking with real-time API-driven data synchronisation.
- Designed a user-friendly and responsive interface to simplify daily vendor operations and improve usability.

ZupZap Admin Panel & Client Panel — *React.js, Material UI, REST APIs*

- Built mobile-responsive admin and client panels using Material UI with core features including order management, vendor onboarding, and delivery tracking.
- Optimised code and architecture to improve load times and enhance overall platform stability and reliability.

Koku & Hirva Energy — Single Page Application — *HTML, CSS, JavaScript, Bootstrap, REST APIs*

- Developed a fully responsive SPA with REST API integration for efficient customer enquiry handling and data processing.

EDUCATION

Master of Computer Applications (MCA) | Feb 2022 – Sept 2023

KLE's Dr M.S Sheshgiri College of Engineering & Technology, Belgaum | CGPA: 8.22 / 10

Relevant Coursework: OOP, Data Structures & Algorithms, Database Systems, Operating Systems, Computer Networks, Software Engineering, Machine Learning

CERTIFICATIONS

- Neural Networks and Deep Learning — Coursera (DeepLearning.AI)
- Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization — Coursera (DeepLearning.AI)
- Getting Started with Flutter Development — Coursera
- Flutter Development — Udemy (In Progress)
